

AIMEE WANG

Applied AI Product and Solution Delivery | RAG, Agents, Evaluation and Production Readiness

Shanghai, China | +86 150 2132 7797 | jingw0129@gmail.com | GitHub: github.com/hahAI111/ai-pm-portfolio

Mandarin Chinese: Native | English: Fluent | Korean: Conversational

PROFESSIONAL SUMMARY

Applied AI and machine learning professional with 7+ years of experience across enterprise GenAI, cloud AI, machine learning, and computer vision. As a Technical Advisor at Microsoft, translates ambiguous customer and operational problems into structured use cases, solution requirements, lightweight prototypes, evaluation criteria, and production-readiness actions. Combines technical fluency in RAG, agent workflows, Azure AI Foundry, Azure OpenAI, Azure Machine Learning, KQL, and observability with cross-functional delivery, customer problem framing, and operational improvement.

CORE CAPABILITIES

AI product discovery and requirements | RAG and agent workflow design | Azure AI Foundry and Azure OpenAI | Evaluation and AI guardrails | Technical validation and production readiness | Cross-functional delivery and stakeholder communication | KQL, telemetry, incident triage, and RCA | Playbooks, runbooks, and technical enablement

PROFESSIONAL EXPERIENCE

Microsoft | Technical Advisor, GenAI Delivery and Operations | China | Aug 2020 - Present

- Partner with enterprise customers to translate ambiguous business and operational problems into structured AI use cases, user workflows, solution requirements, acceptance criteria, and validation plans.
- Evaluate RAG and agent-based applications across retrieval relevance, grounding, data quality, context management, tool-calling behavior, output quality, and recurring failure scenarios.
- Build lightweight demonstrations and workflow prototypes to clarify requirements, test technical feasibility, identify product risks, and reduce uncertainty before implementation.
- Guide production readiness for Azure AI Foundry, Azure OpenAI, and Azure Machine Learning solutions, including observability, operational safeguards, go-live criteria, and incident readiness.
- Lead evidence-based incident investigation and RCA using KQL, telemetry, and logs; coordinate cross-functional mitigation for complex AI workloads.
- Authored 10+ troubleshooting playbooks and operational runbooks that standardized investigation, escalation, and customer-handoff practices.
- Maintained customer satisfaction of 4.9/5 and mentored 10+ new team members through technical coaching, structured onboarding, and case reviews.

iWaySense | Algorithm Engineer | China | Jul 2019 - Jul 2020

- Engineered image preprocessing algorithms, improving lane-detection accuracy by 25%; supported model training, dataset preparation, error analysis, and algorithm optimization.

INDEPENDENT AI PRODUCT PORTFOLIO PROJECTS

Global Seller Growth AI Portfolio | GitHub: github.com/hahAI111/ai-pm-portfolio | Demo: github.com/hahAI111/ai-pm-portfolio/releases/tag/v1.0-portfolio-demo

- Built four working AI product prototypes using Python, Streamlit, synthetic data, and Azure AI Foundry: Seller Growth Copilot, Marketplace Opportunity Discovery, Seller Support Automation, and Marketing Lead Discovery RAG.
- Defined product hypotheses, MVP boundaries, stakeholder collaboration plans, and evaluation frameworks across action completion, conversion, ROAS, support quality, retrieval performance, and safety escalation.
- Designed a source-grounded Lead Discovery RAG prototype with hybrid retrieval, reranking, citations, deterministic ICP scoring, a synthetic golden dataset, and Recall@3 / Precision@3 evaluation.
- Established AI control boundaries: deterministic logic for structured facts and policy decisions; Azure AI Foundry for explanation and response drafting; human review for policy-sensitive or high-impact scenarios.
- Published a captioned portfolio demo and technical PM logbook covering RAG design, agent controls, evaluation, trade-offs, and pilot evidence planning.

EDUCATION

MSc, Computer Science | University College Dublin, Ireland | 2016 - 2017

BSc, Media Software | Sangmyung University, Korea | 2013 - 2015

BSc, Computer Science | Dalian University of Foreign Languages, China | 2011 - 2013

CERTIFICATIONS

Microsoft Certified: Azure Solutions Architect Expert | Microsoft Certified: Azure AI Fundamentals
